

Crypto-Pets Origin

CryptoPets started as a small idea where people could own puppies, kittens and even exotic pets virtually. Crypto pups was the first ever collection to be minted on WAX Blockchain. Initially created as hand designed pixel art collectibles which had different attributes mostly fictional attires along with rarity fixed, these pups featured real world breeds of dogs as digital collectibles.

It has now evolved into a play-to-earn game where you could stake the pets, breed them, blend and level them up to increase the stake power! CryptoPets will also have vIRLs with digital authenticity on WAX blockchain. Now come with us and embark on the journey of owning and living with your cute pets digitally.

End game

To create a VR world where your digital pet would run around you in the metaverse, fight alongside you and even earn you some money in real life. This might seem too far fetched but it's within the grasp. Always expect the unexpected with Cryptoverse Z.

Blockchain

Worldwide asset exchange is the choice of Blockchain for CryptoPets due to a lot of reasons. This blockchain was created fundamentally for the distribution and trading of NFTs mainly for games; it has many user-friendly decentralised applications to interact with our NFTs.

WAX Blockchain provides almost free transaction for every NFT transfer, minting and gaming. Users are required to stake a small refundable amount of WAX in order to use the Blockchain resources more freely. This blockchain was the 1st to use a delegated Proof Of Stake consensus algorithm which makes WAX a more cleaner and carbon neutral Blockchain.

We chose WAX Blockchain so that our players would be able to play the game with only a little investment to play the game and pay for the RAM. It is stated that Blockchain is 125,000 times more efficient than ETH and 320000 times more efficient than bitcoin. Our NFTs, blend materials and our tokens are all created and minted on WAX blockchain with the help of Atomichub DApp and Neftyblocks.

\$KASU - Quick overview

\$KASU will be the token that is going to be used for all the collections that come under CryptoPets game! It has many utilities out of which the utilities for CryptoPets game will be explained in the KASU tokenomics stated at the end of the document.

Why stop with one collection? Collect them all!

CryptoPets games will have not only the CryptoPups collection but also lots of new collections that are going to be here for you to collect and play. The ultimate aim is to create an ecosystem full of digital living pets.

People love pets; I love pets and I assume everyone reading this white paper also loves pets, few people love puppies, cats and few love chameleons and love to pet their cool iguanas, everything is gonna be there in CryptoPets. We are going to have birds, rabbits, ferrets and much more, trust me!

I'm going to list the number of collections and their features that belong to crypto pets game below. Please do have a thorough read so that you can be an awesome pet breeder/evolver.

CryptoPets will give the opportunity to own every exotic pet out there, even a tiger, a bear cub or anything that can be owned as a pet in this ecosystem. And all of these entities from each collection's schema will be stakeable for KASU tokens and you can use the tokens to buy, breed, evolve, blend and do anything within the CryptoPets game. Happy collecting everyone!

AND
MUCH MORE

CryptoPups was the very first NFT collection under CryptoPups that was started in March 2021. All real world breeds of dogs combined with some unique characteristics, power ups, evolutions and sometimes Rare famous characters from the existing fictional world as well. We currently have over 20,000 NFTs including pups, blends and promo stickers. Collect them all, stake them, breed new pups and earn while playing and collecting these cute puppies. All schemas are either related to a breed of pups or an exclusive limited edition event.

Breeds & Rarities

Read through this section carefully to know about all the available breeds and the rarities. Why should I know this? Proper knowledge of this will help you accumulate a hefty amount of \$KASU coins, you can use these to help with the breeding, buy packs or even use a swap exchange to earn cash.

Available Breeds so far...

Beagle

Labrador

Pompom

Poodle

Great Dane

Great Dane
(Black)

Chocolate
Poodle

Husky

Chihuahua

Pug

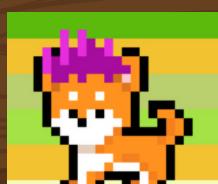

German
shepherd

Dalmatian

St. Bernard

Shiba Inu

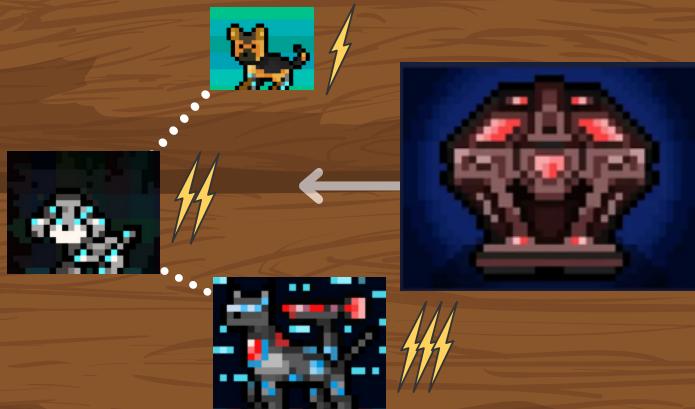

AND
186 MORE TO GO !

Special event schema available...

Pup Space War

Pup Trek

Goku Day Event

Judgement Day

This above list is tentative and it will be constantly updated and there'll be more pups coming for you guys to collect and earn with these cute pups!

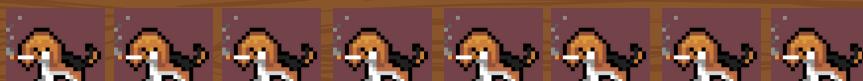

Now moving on to rarities.

Available rarities in the collection

Abundant

Common

Uncommon

Rare

Super Rare

Ultra Rare

Legendary

Mythical

God

Rarities will decide the value of NFTs in the market as well the stake rate. 'GOD' rarity is the true NFT meaning 1/1(Only one in existence) and it holds the highest power and the hierarchy descends down to 'Abundant' having the lowest value

*Limited Editions of these rarities are a lot more scarce and have more value.

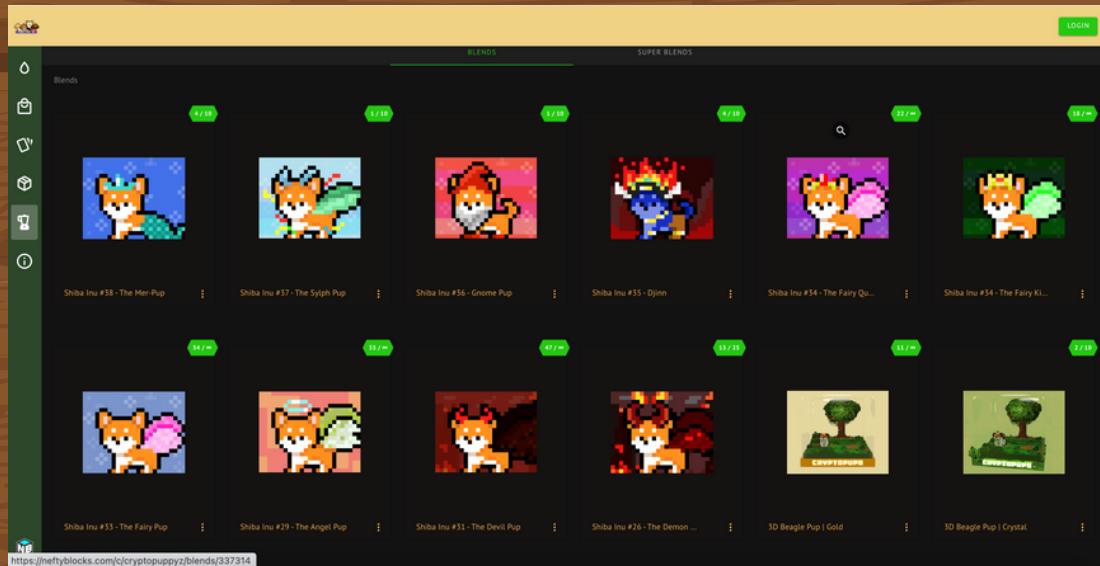

How do you level-up?

Looking to level up your cute pups to win contests, battles to come out just to increase your staking power to earn more!? Here's the quick guide to do that!

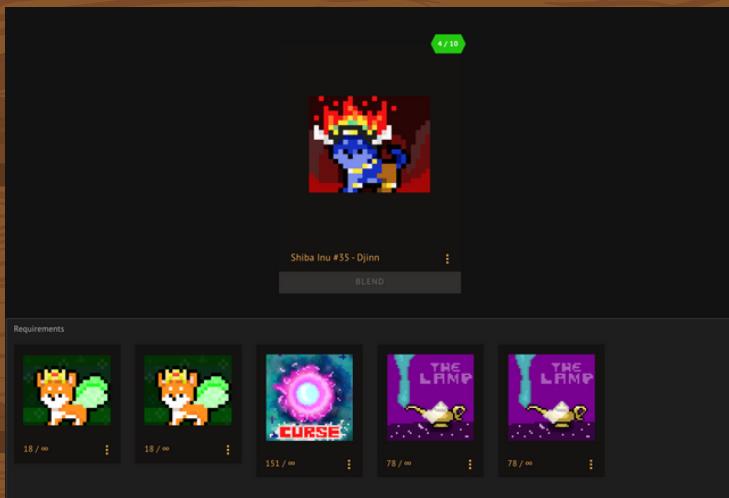

Blend them all

First let's take a look at the available blends. Go to the following page to look for the available blends and the ingredients needed.

www.neftyblocks.com/c/cryptopuppyz/blends

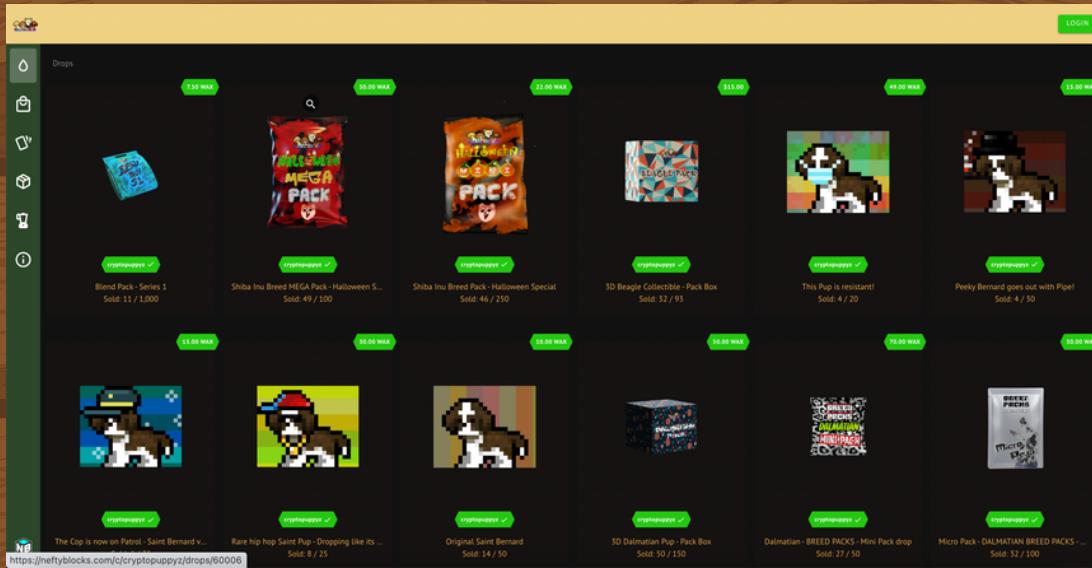

Now select your favourite evolution and find the ingredients!

If you don't have the necessary requirements, you can buy them directly from the drop (if available) or from the secondary market!

Check off the drop is still available! You can buy at a much lower price than the market price here!

www.neftyblocks.com/c/cryptopuppyz

Oh the drop has ended or claimed fully? You can grab all the ingredients from the secondary market either at Neftyblocks or Atomichub and if you're lucky you can claim from the creator profile's listing too.

The links and images are given below for your reference!

Creator profile (burb2.wam)
listing

bit.ly/cryptopups

Atomichub secondary
market

bit.ly/CryptoPupsMarket

Neftyblocks
secondary market

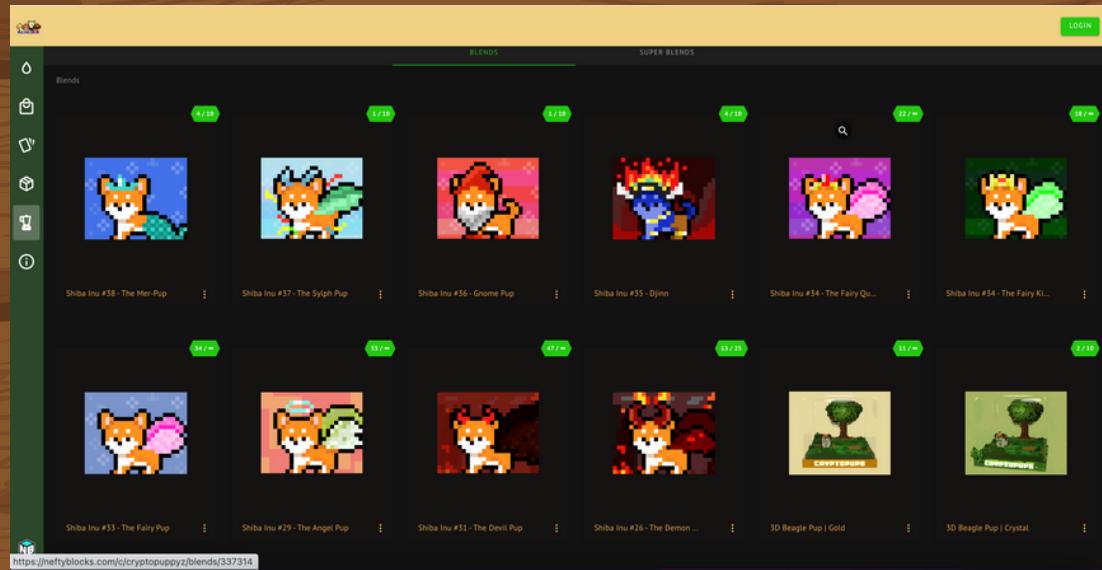

<https://neftyblocks.com/c/cryptopuppyz/marketplace>

And yeah I missed out something! Buying through Neftyblocks and trading in it will automatically reward you with \$NEFTY, earn while buying too.
Happy earning

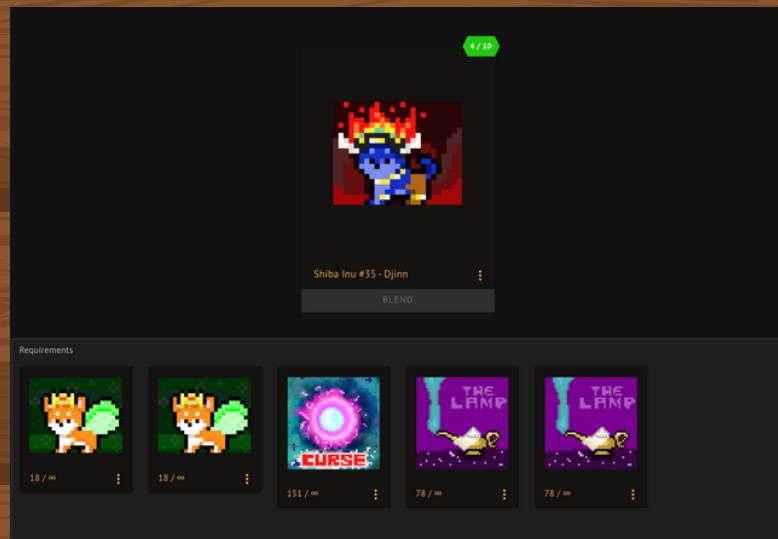

Now you have all the ingredients in your hand? Let's start to blend and evolve your pup!

Follow all the steps listed below to start leveling up!

[Go to blend page](#)

Click your favourite evolution

Now click "BLEND" to evolve your pup

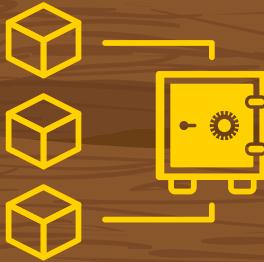

Now that you have level up, check if there are more evolutions for that pup!
The final level is GOD. Don't stop till you get yourself a god.

Stake & Earn

Let's see how Staking works!

Early adopters, we made sure you will get rewarded enough for supporting the project early on! Don't worry that you aren't an early adopter, we have only released 11 breeds out of the 120 chosen breeds of pups all around the world.

Staking will be defined in the following way!

So for each pup issue rate would be (base rate * multiplier) this will change in future according to their activity, store time, inventory etc...

And whenever a new breed is released all existing multipliers will reduce by $\frac{1}{4}$ times

All this set aside, the issue rate of any pup nft will be defined by,

Issue rate = Rarity base issue rate x Breed multiplier

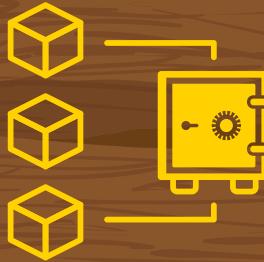

And whenever a new breed is released all multipliers will – reduce by 25% times
Breed Multiplier is automatically set to change whenever a new breed is released.
Ex : Initially Beagles breed schema would have a multiplier of x3 and when a new breed is released a new multiplier would be $3 - (3 \times \frac{1}{4}) = 3 - \frac{3}{4} = 2\frac{1}{4}$.

Mining Pools

Let's see how Staking works!

Early adopters, we made sure you will get rewarded enough for supporting the project early on! Don't worry that you aren't an early adopter, we have only released 11 breeds out of the 120 chosen breeds of pups all around the world.

Mining Pools

Rarity Based Issue Rate

Rarity	\$KASU Issue Rate / day
Abundant	1
Common	2
Common (Limited Edition)	2.5
Uncommon	2.5
Rare	3
Rare (Limited Edition)	3.5
Super Rare	5
Super Rare (Limited Edition)	6
Ultra Rare	5.5
UltraRare	5.5
Legendary	7
Mythical	10
God	20
Promo Prime	0.5

Mining Pools

Schema Based Multiplier

Breed	\$KASU Multiplier
beaglepup	5
labradorpup	5
pompompup	4
poodlepup1	3
poodlepup2	3
greatdane	2
greatdaneblk	2
huskypup1	2
chihuahuapup	2
pugpup	2
germanshepup	1
dalmatianpup	0.7
stbernardpup	2
shibainupup	0.5

And as said the Schema will be the Multipliers so the designated Staking multipliers so far would be as above.

Mining Pools

Schema Based Multiplier

Event Name	\$KASU Multiplier
pupspacewar	2
pupballz	3
judgementday	2
puptrek	2

There are more Breeds coming in as we just have released 10+ Breeds out of the available 400 Authenticated breeds of Puppies.

That being said, early adopters should be rewarded. So, the initially released breeds will always have the highest staking power.

Events will be conducted on a seasonal basis and their stake value is tentative only.

Reward Pool

We have allocated 100 million \$KASU just for the rewards till the end of time but don't worry about the huge amount because when the collection and staking launches only 10% of the rewards pool will be unlocked. As the CryptoVerse progresses the rewards will slowly increase!

Ways of earning your rewards:

- Be an active collector and try to participate in all events
- Be a star supporter at our discord
- Become a GOD holder
- Once the battle games begin try to achieve the top 50 spots to get rewards

\$KASU Rewards Explained

- 20% of the total KASU supply is reserved for Dev's and Creators
- The Rest 80% is split into 50-30 for two different reward pools
- First, the community reward Pool to reward the active community and use for their Voting purposes
- Community rewards will also be used for changes made in the ecosystem voted by community
- Secondly, Battle and tournament rewards pool will be allocating 30% of the liquidity.
- This is to ensure that all participants of the CryptoPups, CryptoPets and CryptoVerse will continuously get rewarded throughout lifetime.
